EDUCATION

University of California, Santa Cruz
B.S. Computer Science

Graduated June 2026

TECHNICAL STRENGTHS

Programming Languages	Python, C/C++, HTML/CSS
Tools	Docker, Git, Google Drive, Whisper
Languages	Fluent in English and Spanish

WORK EXPERIENCE

ACE Parking <i>Valet Parking Attendant</i>	Summer 2023, Present, Seasonal <i>Santa Clara, CA</i>
--	--

- Delivered professional service in fast-paced environments while coordinating colleagues for retrieval and customer requests.
- Maintained attention to detail and company standards when handling requests and critical information.
- Showed reliability through continued returns.

P.A.L. (Police Athletic League) <i>Youth Mentor</i>	Sept. 2021 - June 2022 <i>Redwood City, CA</i>
---	---

- Led workshops and activities fostering teamwork, skill development, and community engagement.

RELEVANT PROJECTS

Video Transcription and Organization <i>Whisper, Google Drive</i>	Spring 2026
---	-------------

- Transcribed more than 10 hours of video using Whisper and reviewed the text for formatting and transcription errors.
- Structured the data into Google Docs files, using titles, sections, and time-blocks to make content searchable.

MapReduce Framework and Data Application <i>C, Docker, Git</i>	Spring 2026
--	-------------

- Designed and implemented multithreaded MapReduce framework in C using custom structures for the implementations of split, map, shuffle, and reduce.
- Implemented hash-based partitioning for efficiency, data-aggregation, coordination, and sorted output.
- Built parallel counting application for processing and data organization.
- Developed and debugged framework in a Dockerized Linux environment using Git for version control.

Small Business Websites <i>HTML, CSS</i>	Present
--	---------

- Designed a responsive website for a pool-cleaning business. Organized services, portfolio images, and contact information sections.

- Regularly met with business stakeholders and gathered requirements, received feedback, and implemented requests for content and design.
- Tested live navigation, layout, and contact-form behavior across multiple media screens.

Quantum Image Processing

Spring 2026 - Present

Python, Qiskit, Numpy

- Reimplemented quantum image-processing techniques based on published research, including Quantum Probability Image Encoding, denoising, and edge detection.
- Developed Jupyter notebooks for preprocessing, converting between RGB and grayscale representations, and encoding pixel values as quantum-state amplitudes.

LEADERSHIP AND INVOLVMENT

CruzHacks, Association for Computing Machinery (ACM), Society of Hispanic Professional Engineers (SHPE)

- Leading member in mentorship and professional development communities at UCSC.
